DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 2, 38, 47-60 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2, 6, 11, 20, 24-28, 32 and 33 of U.S. Patent No. 6,623,553. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present application overlap said claims and would be obvious thereby.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ahn (US Patent 5,834,047).

Ahn teaches a method of imprinting with an edible ink (abstract and col. 2 lines 33-35). The reference further teaches that the edible ink composition comprises 1 to 30 percent by weight of food dye, 1 to 30 percent by weight of purified water, 1 to 50 percent by weight of oxide titanium, and 40-98 percent by weight of liquefied sugar (col. 2 lines 45-53). The only limitation in the claims not found by the Examiner is the viscosity of the ink composition. However, this limitation is considered obvious because there does not appear to be any reason why the cited reference would not contain an ink composition with applicants claimed viscosity because similar ink compositions with the same ink components would obviously have same properties (i.e. viscosity).

Allowable Subject Matter

Claims 39-46 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The references alone or in combination fail to teach an article comprising an edible substrate, and edible ink disposed on an exposed surface of the edible substrate, the ink having a viscosity of about 200 to about 16000 cp at 25°C wherein the edible ink is transferred to the edible substrate using a printing process.

Conclusion

The remaining references listed on forms 892 and 1449 have been reviewed by the Examiner and are considered to be cumulative to or less material than the prior art references relied upon in the above rejections.
